

## Advanced Mathematical Models & Applications

Vol.10, No.1, 2025

### Table of Contents

**C.M. Khalique, B.P. Sebogodi** (pp.208-223)

A Study of Lie Point Symmetries, Optimal System, Analytical Solutions and Converged Vectors of the Mixed Doubly Nonlinear Dispersive Burgers Equation

**S. Serovajsky, O. Turar, T. Imankulov, A. Azimov** (pp.224-239)

Forecasting of the Epidemic Propagation Based on Solving the Inverse Problem for Discrete and Continuous Mathematical Models of Epidemics with Vaccination

**M. Amirsoleimani, J.R. Roshan, M. Mursaleen** (pp.240-265)

The m-Dimensional Generalizations of Darbo's Fixed Point Theorem and its Applications

**M. Hasanov, S. Piriev, K. Abdullayev, E. Payizov, T. Rasullu, N. Camalzada, J. Namazov** (pp.266-276)

Mathematical Model of the Durability of Materials Used in the Manufacture of Nanosatellites

**C.D. Wickramasinghe, N.S. S.M. Hapuhinna** (pp.277-292)

Estimating Drug Parameters of System of Differential Equations for Brain Cancer Treatment through Pharmacokinetic Compartment Modeling

**F.L. Hasan, A. Nachaoui** (pp.293-303)

A Numerical Method for a Nonlocal Parameter Identification Problem

**N. Aghamaliyev, Y. Aghamaliyeva, G. Salehzadeh, A. Dadashova, D. Juraev** (pp.304-315)

A Mathematical Model for the Maintenance Scheduling Problem with Disturbance Effect and Single Maintenance Team

**B. Ekhveh, S.J. Hosseini Ghoncheh, V. Parvaneh** (pp.316-334)

Fixed Point Theorems in Strongly Sequential S-Metric Spaces and Their Application to the Solution of a Second-Order Boundary Value Differential Equation

**N.Sh. Iskenderov, U.S. Alizade, V. Jeferli** (pp.335-346)

On an Inverse Boundary Value Problem for a Third Order Hyperbolic Equation Describing Propagation of Longitudinal Waves in a Dispersive Medium with Neoclassical Boundary Conditions

**S.F. Enríquez Guzmán** (pp.347-362)

Mathematical Modeling of a Crank-Connecting Rod System and the Effectiveness of a Flywheel

**N.C. Demirpolat, E. Kılıc** (pp.363-371)

Edge Modern Roman Domination of Graphs

**H.O. Muslim, W.F. Keidan, A.K. Hassan Khaji** (pp.372-381)

Approximation by Micchelli Combination of Half Bernstein Polynomials

**S.K. Rezaei Jamnani, M. Matinfar** (pp.382-395)

Kharrat-Toma Homotopy Method to Solve Linear and Nonlinear Klein-Gordon Equations

**Z. Hao, M.Y.B. Yahya** (pp.396-408)

Research on the Construction of Mathematical Model of Agricultural Supply Chain Information System Evaluation under Block Chain Technology

**R. Polat, B. Pektas** (pp.409-415)

An Artificial Neural Network Solution to the Space-Time Fractional Partial Differential-Difference Toda Lattice Equation

**K. Mutashar, M.A. Hussein, H.K. Jassim** (pp.416-428)

A Novel Computational Algorithm for Efficiently Solving Partial Differential Equations
