

Charuka D. Wickramasinghe, Krishanthi C. Weerasinghe, Pradeep K. Ranaweera, Nelum S.S.M. Hapuhinna (pp.275-300)

PBPK-iPINNs: Inverse Physics-Informed Neural Networks for Physiologically based Pharmacokinetic Brain Models

Merve Karaoglan, Erdal Bas, Etibar Panakhov (pp.301-311)

A Different Perspective of M -Whittaker Equation via Applications

Andini Setyo Anggraeni, Nahrul Hayati (pp.312-326)

Markov Chain Modeling and Interpolation of Stroke Morbidity-Mortality Tables using Constant Force Assumption

Mohamed Chaher, Mohamed Yassir Nour, Abdellah Lamnii (pp.327-343)

Cubic Generalized B-Spline Quasi Interpolation Scheme for Solving Nonlinear Burgers' Equation

Tichaona Chikore (pp.344-362)

The Pathology of Virality: A Mathematical Epidemiological Model for Social Media Marketing

Esin Ilhan (pp.363-377)

Analytical Structures and Conservation Laws of the $(2+1)$ - Dimensional Cubic Klein-Gordon Equation

Agil Hanmammadov, Afag Mamedova (pp.378-383)

The Equation of Vibrations of a String with Delta-Interaction

Olzhas Turar, Semeon Serovajsky, Anvar Azimov, Timur Imankulov (pp.384-404)

Mathematical Modeling of the Epidemic Spread with Vaccination and Limited Time of Immunization

Faieza Samat, Eddie Shahril Ismail (pp.405-413)

Modified Adapted Hybrid Methods for Linear Second-Order Ordinary Differential Equations

Gültekin Tınaztepe, Ilknur Yesilce Isik, Sinem Sezer Evcan, Gabil Adilov (pp.414-427)

Inequalities Pertaining to General Fractional Integral Operators for s -Convex Functions in the Third Sense

Sameer Bawaneh, Areen Al-khateeb, Hamzeh Zureigat, Mohammad W. Alomari, Dana Al-Jalouli (pp.428-441)

Analysis of a Coupled System of Sequential Fractional Differential Equations Subject to Two-Point Integral

Conditions: Existence, Uniqueness, and Stability

Maryam Almutairi, Norazrizal Aswad bin Abdul Rahman (pp.442-454)

On Stability of Second-Order and Fourth-Order Compact Finite Difference Methods for Solving Fuzzy Time-Fractional Wave Equation in Double Parametric Form of Fuzzy Numbers

Mukhiddin I. Muminov, Navruz M. Usmonov (pp.455-469)

Approximate Solution of Boundary Value Problem for Linear Second-Order Differential Equations

Ibrahim M. Nabiev, Aygun R. Latifova, Leyla I. Mammadova, Jalala A. Osmanli (pp.470-479)

Inverse Problem for the Dirac System with a Spectral Parameter Linearly Contained in a Boundary Condition

Nelson Berrocal Huaman, Mohamed Haneef Mubeen Tajudeen (pp.480-492)

Combinatorial Bounds for Double Domination Integrity in Graphs: A Planar Refinement for Network Robustness

Arika Indah Kristiana, Dafik, Intan Nurul Awwaliyah, Indah Ibanah, Indah Lutyatul Mursyidah, Subramanian Siva Shankar, Zainur Rasyid Ridlo (pp.493-506)

Application of b-Local Irregular Vertex Coloring in Blockchain Architecture for Horticultural Supply Chain Transparency
