

ADVANCED PHYSICAL RESEARCH

Vol.7, No.2, 2025

Table of Contents

Gulyaz Najafova, Gulshen Agaeva (pp.150-158)

Conformational Study of Synthetic Beta-Amyloid Peptide (25-35) Analogs

F.Y. Humbatov, G.F. Aslanova, R.I. Khalilov (pp.159-170)

Measurement of Radon concentration in water samples from the Kelbajar district of Azerbaijan and risk assessment of its radiation dose

Le Dai Vuong, Nguyen Dang Nhat, Vo Quang Nha, Huynh Thi Thuy Linh, Phan Tuan Anh, Vo Thi Thanh Kieu (pp.171-183)

Influence of $\text{Bi}_4\text{Ti}_3\text{O}_{12}$ Doping on Structure, Microstructure, and Electrical Properties of $(\text{K}, \text{Na}, \text{Li})(\text{Nb}, \text{Sb})\text{O}_3$ Ceramics

I.J. Islamov, R.G. Akhundov, D. Dimitrov, V. Panevski (pp.184-195)

Modeling of a Circular Disk Monopole Antenna Fed from a Microwave Broadband Coplanar Waveguide

A.Ch. Mamedova, S.I. Mekhtiyeva, H.J. Huseynov, Y.I. Aliyev, H.I. Baghirova (pp.196-203)

Solid Solutions in $\text{Cu}_2\text{Se} - \text{Ga}_2\text{Se} - \text{In}_2\text{Se}_3$ Nanothick Films

Mohammed Abdul Kadhim Hadi Al-Sadi (pp.204-211)

Uranium and Radon Concentration in Soil Samples for the Gas-Fired Power Plant in Babil Governorate – Iraq

B.D. Igamov, I.R. Bekpulatov, V.V. Loboda, V.V. Zhurikhina, A.I. Kamardin, M.S. Lukasov, G.T. Imanova (pp.212-221)

Electrophysical and Thermoelectric Properties and Crystal Structure of the Formed Mn_4Si_7 Thin Vacuum Coating

H.W. Hamed, M.W. Aziz, N.A. Ahmad (pp.222-230)

Changing the Absorber Layer with a Compound (FeSi_2) to Improve the Efficiency of the Solar Cell using a Simulation Program

Tarana Isayeva (pp.231-239)

Study of Losses in High-Voltage Power Networks under Nonlinear Loads

Nguyen Pham Quynh Anh (pp.240-247)

Localized Plasmon-Polaritons in Multilayer Magnetolectric Hyperbolic Metamaterials

Riyam Adnan Hammudi, Mustafa A. Mahmood (pp.248-259)

Study on Exploring Metal Nanoparticles (MNPs) in Pharmacology and their Future Role in the Diagnosis and Treatment of Cancer

G.V. Aliyeva (pp.260-265)

Temporal, Spatial, and Compositional Variability of the Infrared Signature of Objects
